

## Year 5 Blog - Week commencing 8<sup>th</sup> July 2024

### Super Sports Day!

Monday this week started with a flurry of excitement as Year 5 took to the field to take part in this year's sports day. Thankfully the rain stayed away and the pupils had the opportunity to take in many activities. Spectators and participants thoroughly enjoyed the morning and the sheer level of sportsmanship was a joy to see. All pupils cheered team mates and friends, the atmosphere they created was spectacular.

In History, pupils learned about various Egyptian gods and goddesses, pupils had the opportunity to learn how the Egyptian people worshipped and the impact belief in these deities had on society. Pupils successfully made connections between Egyptian beliefs and other religious practices.

In technology, pupils considered where the food they eat comes from and how different food types are used to create some of our favourite meals. We also looked at different traditional foods from around the world and considered how migration has impacted the foods we eat today.

During Math lessons, pupils converted units of measurement from one form to another, pupils then applied the knowledge gained to real world scenarios.
