

## Year 5 Blog - Week commencing 18<sup>th</sup> March 2024

### Brilliant designers!

Year 5 have had a very busy and creative week!

In writing, we have written a diary entry about our school trip to the National Space Centre. We have used a range of fronted adverbials, contracted words and ambitious vocabulary to accurately express how much they enjoyed it there.

In Maths, we have been learning about perimeter and area. We dove deep into reasoning questions and multi-step problems. Well done Year 5!

In Science, we learned about drag forces, including air resistance. To explore this further, we created our own parachutes allowing the egg to land safely on the ground. This was great fun, and pupils got to share their team skills, leadership and creativity.

In DT, we have been learning all about cam toys. We have finished our learning and design process, and are now creating our own cam toy. The finished product should be complete by next week.

We are looking forward to our final week of Space learning next week with some exciting lessons planned!
