

Year 5 Blog - Week commencing 11th March 2024

Dancing for Red Nose Day!

Maths

This week pupils have developed their understanding of percentages. They have solved a variety of questions that can relate to real life.

Writing

In our writing lessons, pupils finished their piece of writing, that involved imagining they were on the International Space Station and sending a letter to home. They included contracted words and perfect present form within their work. Pupils then began to consider a diary entry, that was inspired to their trip to the space centre, and will include ambitious vocabulary and fronted adverbials.

Science

It is British Science Week and the theme is time! Pupils have been creating some posters that link to the theme of Time and will be able to submit these posters into a competition for a chance to win a prize!

Geography

In Geography, pupils have been learning the importance of Greenwich in terms of time zones! They have learnt about Greenwich Mean Time and the prime meridian. From this, they have been able to consider the different time zones globally and compare this to the time in the UK.

Pupils were incredibly lucky this week to watch a pantomime performance of the Jungle book. Pupils thoroughly enjoyed this experience! Pupils have also enjoyed our Red Nose day activities, where they completed a virtual dance!
