

Year 5 Blog - Week commencing 16.10.2023

'Fantastic Scientists!'

This week Year 5 have finished writing their own narrative based on the story 'Holes'. They have included a range of features in their writing, this includes: expanded noun phrases, fronted adverbials, speech and relative clauses. The Year 5 team have been really impressed by the pupils hard work with this piece of writing!

In maths we have started our next unit, multiplication and division. This week the pupils have focused on understanding their multiples and common multiples. In our science lessons this week year 5 have been looking at soluble and insoluble materials. They completed an experiment to see if certain materials dissolved in water. In our history lessons this week the pupils have developed their understanding of Roman Gods and created their own Google slides to show their understanding. Also, in computing the pupils have been looking at modifying codes and algorithms.

Well done on a great week Year 5 and have a lovely half term!
