

## Year 5 Blog – Week Commencing 27.03.23: Fantastic Foodies

### Writing

Pupils this week researched interesting and informative information about our solar system. They needed to select appropriate facts and statistics and arrange these facts in a fun and exciting double page spread. The pupils really enjoyed looking for new statics about the planets, star constellations and asteroids near earth.

### Maths

Pupils had the opportunity this week to study a verity of graphs and tables. They considered the importance of being able to retrieve important information from different types of tables and how graphs can be used to compare different trends.

### Art

Pupils worked collaboratively to create their own space collages. They used a verity of materials to create different effects. They decided if they wanted to create something abstract or realistic. I know the class teachers were really impressed with how imaginative the pupils were.

### Roots to food

All year 5 pupils this week had a bespoke food technology lesson with a chef. The pupils made chicken or Quorn pesto pasta, with the pesto being made fresh, from scratch. all pupil thoroughly enjoyed this session and hopefully they might demonstrate their new skills at home under adult supervision.
