

Year 5 Blog - Week commencing 10.03.23: Star Wars & Boat Races

Music

Pupils had opportunities to listen to music from Sir Gustav Holt, we payed particular attention to his 'planets' series and Mars. The pupils really enjoyed evaluating this music and a deeper appreciation of a musical orchestra was certainly found.

Pupils were also able to unpick some more orchestra styled music from the Star Wars franchise. Many pupils really enjoyed this recital as it brought back many fond memories.

Science

Pupils this week were considering the causes and effects of drag (air and water resistance). They also had to design and make a boat. Each class competed to see which boat was the most streamlined in a timed race.

PSHE

Pupils considered the causes and consequences of racism. We discussed how racism happens and what we can do to prevent it. Pupils then designed a ribbon to highlight awareness.

Maths

Pupils have started a new subtopic in Maths: perimeter and area, they are really enjoying the problem and solving styled questions and practical aspects of these lessons.

Writing

Pupils started the week by unpicking some popular poetry, they considered the devices poets use to make the reader and interested and captivate their imagination.
