

Year 5 Blog - Week commencing 27.02.23: World Class Readers

This week year 5 took part in many world book day activities. As part of our world book day celebration, we listened to many authors talk about why they enjoy reading and heard about some of their favourite reading spots. Pupils had the opportunity to discuss their own reading habits and talk about their favourite book memories. We rounded world book day by splitting into our house group and took part in a book themed quiz and some charades.

Maths

Pupils have made excellent progress in maths this week. We have been comparing decimal numbers up to 3 decimal places and many pupils were able to engage with some discussion/Investigation type questions.

Writing

Pupils continue to develop an awareness of what a balanced argument is and have been creating a balanced speech about the benefits of humans continuing to explore space.

Design and Technology

Pupils have worked on adapting and implementing design of their camtoys into working toys. We have seen many examples of toys that work extremely well.

Appleton taster day

Year 5 had a really exciting taster day at Appleton school. Pupils had the opportunity to create fizzing rainbows using acids and alkalis in science. They explored reasons why they should adopt a dog in English. Finally, they had an opportunity to recognise patterns in maths.
