

Year 4 Blog - Week commencing 24th June 2024

Temple Trip!

What an exciting and productive week we've had in Year 4! Your children have been engaged in a variety of activities that have sparked their curiosity and enthusiasm for learning. Here's a snapshot of what we've been up to:

This week in maths, we embarked on a new adventure into the world of coordinates. The students learned how to identify points on grids. We are excited to see them use these skills to plot different coordinates next year.

In our writing sessions, the children have been honing their persuasive writing skills. Their task was to craft a text persuading people to take a trip to India. We've focused on using rhetorical questions, modal verbs, and expanded noun phrases to make their arguments more compelling. The creativity and effort they've put into their writing are remarkable. They have come up with some persuasive and imaginative reasons to visit India, and their use of language is becoming more sophisticated with each passing day.

The sunny weather provided the perfect backdrop for our PE lesson this week. The children had a fantastic time playing a game of rounders. It was a joy to see them demonstrating teamwork, sportsmanship, and most importantly, having fun outdoors.

On Thursday, we had a special workshop where the children learned about various future careers. This interactive session was designed to broaden their horizons and get them thinking about the endless possibilities that lie ahead. The workshop was engaging and informative, sparking many interesting discussions about what they might like to be when they grow up. It was a valuable experience that we hope will inspire them to dream big.

To complement our topic on India, we ended the week with an enriching trip to Neasden Temple. This visit was a fantastic opportunity for the children to learn about Hinduism in a real-world context. They were fascinated by the beautiful architecture and the serene atmosphere of the temple. The experience provided them with a deeper understanding of Indian culture and religious practices, tying in perfectly with our classroom learning.
