

Year 4 Blog - Week commencing 15th April 2024

India!

Year 4 have had an exciting first week back from their Easter Break!

On Monday, they were introduced to their new topic India. In the afternoon the children carried out different hook activities, including creating their own henna designs. They took great care in creating extremely detailed and unique patterns. The children also created a mind map on everything they already know about India, hopefully we can add to it as the term continues.

In maths, the children have continued learning about decimals. Year 4 have worked hard at partitioning and comparing different numbers and next week will move onto ordering them. The children worked hard to push themselves onto the tricky challenges

In science our topic for this term is 'Animals including humans'. For our first lesson we learnt about the functions of different parts of the human digestive system. The children were fascinated to learn about different organs such as the liver and stomach and how food is broken down to provide energy for our bodies.
