

Year 4 Blog - Week commencing 25th March 2024

The children have thoroughly enjoyed their topic 'Making a Difference' and have completed so many amazing pieces of work throughout the term on topics such as endangered animals, global warming and plastic pollution!

This week in maths, the children have continued working on decimals. They have learnt how to divide one and two digit numbers by 10 and 100. The children have worked carefully through the different challenges and have secured their knowledge on this topic.

In writing, the children have been writing their persuasive speech to Canvey Council about plastic pollution. They carefully planned different key features such as emotive language, facts and statistics to make sure their writing is effective and powerful.

On Friday afternoon, the children had the opportunity to share the wonderful pieces of homework they had been working on over the term. Us teachers were so impressed by the amount of time and effort the children had put into making informative PowerPoints centered around or topic. We even saw some creations made out of recycled materials.

Well done Year 4 on another great term!
