

## Year 4 Blog - Week commencing 12<sup>th</sup> February 2024

### Year 4 have had an exciting week!

In design technology, the children had the opportunity to do some cooking in their Roots to Food workshop. The pupils, worked carefully in groups to prepare different vegetables such as; slicing red pepper and spring onion, as well as crushing a clove of garlic. We were so impressed by their chopping skills, as each child perfected the claw grip to ensure they were being safe at all times. The children then cooked their ingredients to create Greek Keftedes. They were delicious!

On Friday afternoon, the children went out into the garden and planted chard, spinach, spring onions and peas. They carefully turned over the soil to make sure the moist nutrient rich soil was at the top. Next, they accurately measured out the troughs into which they put the seed. Finally, the children watered their plants. We are excited to watch them grow over the next couple of months!

In art this week, the children learnt about Andy Goldsworthy who is known for his amazing artwork created from natural resources. The children felt very inspired and created beautiful double page spreads detailing his life and critiquing his artwork.
