

Year 4 Blog - Week commencing 5th February 2024

Lego Spike!

Year 4 have had a super week, with one of the highlights being their celebration assembly performed in front of the parents on Tuesday. The children were extremely excited to share the amazing work they have been completing over the last couple of weeks. We teachers were very proud at how they read and shared each piece.

During DT this week, Year 4 created a dancing robot. The children worked enthusiastically in groups and they each achieved their end goal. By following the instructions, Year 4 pieced together the Lego spike pieces to create their final products.

In writing this week, Year 4 have started their new recount unit. The children have been learning how to write in the past tense and first person. We are excited to read their super work next week.

In maths, Year 4 have moved on their new topic; fractions. They have been working hard and are beginning to be able to count up and down in fractions.
