

## Year 4 Blog - Week commencing 22<sup>nd</sup> January 2024

### Year 4 have enjoyed yet another exciting week!

In Maths this week, the children have begun their measurement unit and have been learning about mm, cm, m and km. They have become experts at working out equivalent lengths using the different units. Additionally, to this, Year 4 have been working out the perimeter of different shapes. They have learnt different methods to work this out to ensure accuracy each time.

In Science this week, Year 4 have continued their learning on classifying animals. Using a Venn Diagram. The children sorted different animals, working out which fell into which category and which animal could actually be in both groups.

During our writing lessons, the children researched facts about endangered animals using their chrome books. They will use their findings when completing their fact file writing. The children have also been working on adding in extra detail into their work using parenthesis. This will come in handy during their non-fiction writing.

In PE, the children enjoyed a rotation of activities. They perfected their yoga poses and practised mindful meditation as well as a fitness class, followed by a first aid lesson.
