

Year 4 Blog - Week commencing 13.11.2023

Future Engineers

This week in year 4 we have finished our DT project on cars! We did the final finishing touches to our creations and then evaluated them into our DT double page. We are soooo impressed with how some of them look! The children really stuck to the design brief and created something eye-catching and unique!

In writing this week, we finished our persuasive speeches which convinced people to use The Super Clean Up invention. To publish our work we got to record our speeches and we uploaded them to google classroom! Make sure to login to your google classroom at home to listen to your fantastic speeches!

We got to start The Dyson project this week as part of our DT lessons, this will tick off TWO badges on our personal passports so we are super excited about this. This week we were exploring what we thought a design engineer looked like and we sketched a design. By the end of the lesson we realised that design engineers just looked like ordinary people and that throughout this project, we will all become engineers!
