

## Year 4 Blog - Week commencing 30.10.2023

This week in year 4 we have been able to use Lego Spike for the first time this year! This time we got to make The Super Clean Up invention which is designed to make the world a better place by helping us pick up rubbish quickly and easily.

We showed fantastic team work and perseverance when building the invention and we worked really hard to focus on each instruction so we didn't go wrong. We built two different grabbers so we could test to see which one was more effective.

At the end of the sessions, we got to test the grabbers on various materials! We tested how well it picked up a Lego brick, a crumpled-up bit of paper, a whiteboard pen and a glue stick. Each class then made a conclusion as to which grabber they thought was most effective, our opinions were split!

During our writing lessons this week we have been looking at persuasive writing features. Next week we will be writing a persuasive advert where we will try and convince the reader to buy and use The Super Clean Up.

We looked at how to write speech correctly, so we can write a positive customer review. To practice this technique, we re-wrote text messages into proper speech and wrote an advert about a theme park that including positive reviews from customers who had visited before.
