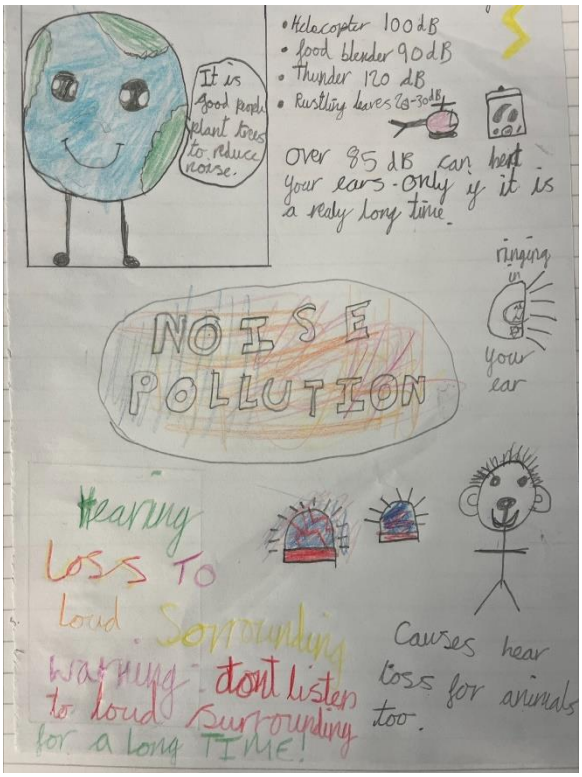
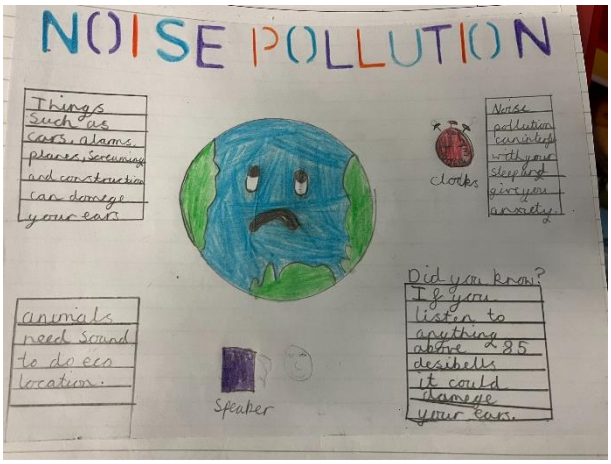
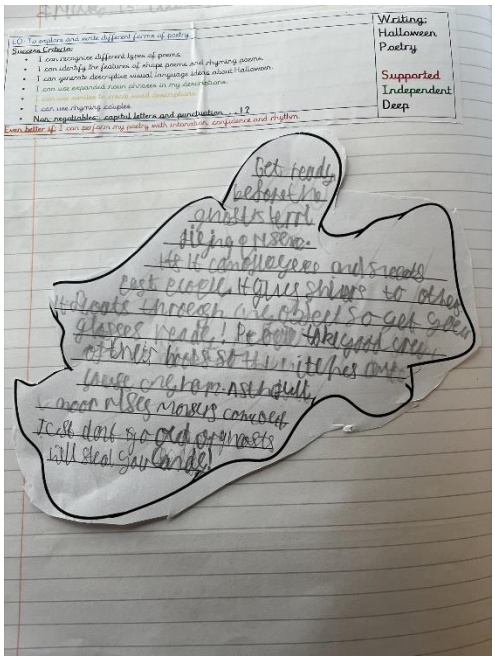
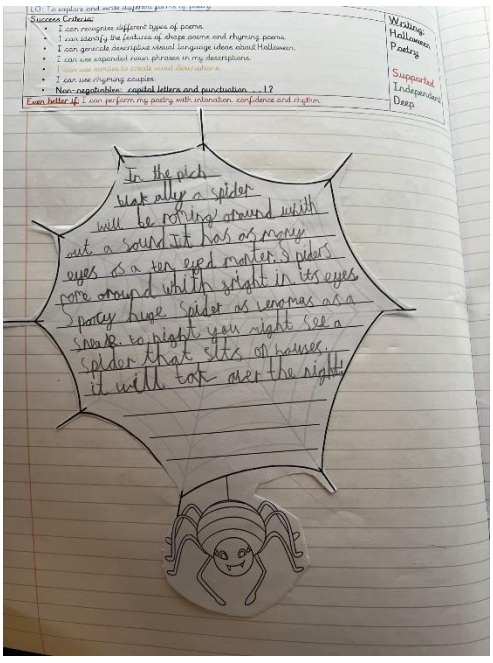
Year 4 Blog - Week commencing 09.10.2023

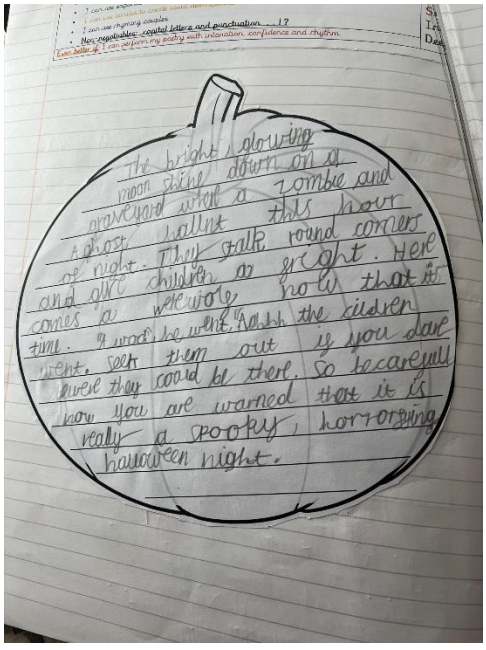
'Sound Safety!

This week in science we finished our unit on sound! First we were using data loggers to measure sound in decibels and then we created posters on the impact of noise pollution. We learnt about what the cause/sources of noise pollution was and ways we could try to reduce this.










In writing lessons, we were planning out of Halloween shape poems. We've been working on expanded noun phrases and similes! We've created a list of these, using fantastic vocabulary so we can use them in our poems next week!
