

## Year 4 Blog - Week commencing 10.03.23: Exploring Hyde Hall

This week in year 4 we were lucky enough to go on our first school trip of the year! We got to spend the day at Hyde Hall doing a range of activities about local wildlife and habitats. We got to complete 3 different activities throughout the day! We went on a woodland walk, where we looked for different animal habitats and did some bird watching. We learnt how to build our own animal habitats and made some bird nests and bug hotels. Finally, we got to look at a 'dead' table and understand how living things eventually decay, we made our own sunflower seed packets and planted our own cress in a paper pot that we made!

We had such a fun filled day and we loved getting to do so many activities - we were very busy! Excitingly, we are able to tick off a few more of our personal passport badges now too!

4JC also went on their rescheduled local area litter picks this week! They walked around the streets that surround our school and gave it a tidy up, they collected several bags of rubbish!
