

Year 4 Blog - Week commencing 20.02.23: Dancing Robots!

This week in year 4 we have been demonstrating our fantastic teamwork, resilience and problem-solving skills when using Lego Spike in our DT lessons. We love using Lego Spike so we were all super excited to get the kits back out! This time in year 4 we were making a break-dancing robot which would encourage people to get up and move! Its purpose was to increase physical activity in children because we understand how important this is! We worked in pairs to build our creations, making sure we focused and communicated well to ensure we didn't go wrong. At the end, we tested the robot to see if we had successfully built them so they would dance. Lots of us were successful and managed to make a fantastic robot!

We have done lots of art lessons this week which has been really fun! We are studying the artist Andy Goldsworthy this half term and will be creating a final piece inspired by his work. We started this unit by learning about Andy Goldsworthy as an artist and we created a collage of his famous work alongside some facts we had learnt about him - lots of these looked fantastic!

We've also had lots of exciting things happening outside of our lessons this week. On Tuesday we held class pancake tossing competitions! We had so much fun doing this and demonstrated fantastic teamwork as we were encouraging our classmates during their turn! We were competing to see which house had the highest total combined flips! Look out for the announcement of the winners on the newsletter.

We also finished the Spelling Bee competition this week, we got to watch our 4 year 4 finalists (Erica, Jacob, Evelyn and Imogen) battle it out in the grand finale. A huge congratulations to Evelyn and Imogen who were the joint winners for year 4!
