

Year 6 Blog – week commencing 22nd January 2024

Eruption of the year 6 volcanoes!

It's been all about volcanoes this week, in writing and geography we have focused on how volcanoes are formed, the different types of volcanoes and natural disasters across the globe. The children have written fantastic fact files detailing the causes of eruptions of volcanoes, as well as the different types of magma and lava.

In geography, children made volcanoes to erupt outside on the playground. We used mentos and cola to cause the eruption – the children absolutely loved this!

In PSHE, we have been discussing world issues – the children discussed their dreams for a peaceful world. They had fantastic dreams for the world and made the year 6 team very proud!

In DT the children built robots using Lego Spike, they had to programme their robots to move around an assault course, successfully moving around the paper!
