

Year 6 Blog – week commencing 8th January 2024

Origami, Manga, koi fish and a collaborative year 6 wave!

We have started the Spring term with a fantastic hook day, exploring the Japanese culture. We drew Japanese koi fish – to add to our year group koi display. The children used different colours to add colour and depth to give a fantastic visual representation of the traditional animal of Japan.

During Origami the children wowed us with their creativity! They made fantastic origami cats, frogs, fish, koalas and even dragons! They are fantastic and every single child's origami has been displayed in the year 6 area.

Year 6 made four fantastic wave displays – they worked collaboratively to paint, colour and design a Japanese wave, working together to ensure it flows; allowing it to be an excellent representation of the great team work we have in year 6!

The children further looked at Manga art, which is a type of animated drawing that originated in Japan. The children drew fantastic pictures of Pokemon, Sailor moon and different Manga designs. They looked very authentic!

In writing the children have worked hard on a setting description, describing what it is like to visit Tokyo, Japan. They used expanded noun phrases and dashes for extra information to enhance their writing skills!
