

Year 6 Blog – Week commencing 27.02.2023: Website building, world book day and a dodgeball game!

In English, year 6 have continued writing to inform about earthquake that happened in Japan in 2011 which triggered a tsunami. They have started their final piece of writing which we are impressed with. They are challenging themselves to use relative clauses, colons and semi colons.

In Maths, the children have been focusing on perimeter and area of shapes: using the perpendicular height and base to calculate the area. The children continue to focus on arithmetic skills each lesson.

In PSHE, the children have discussed different types of categories of drugs: restricted, unrestricted, prescribed and illegal. Children were shocked to realise that coffee is classed as a restricted drug because of the caffeine!

In computing, the children have been building their own websites (which they have thoroughly enjoyed). They are exceedingly quick at picking up tips on the Chromebook!

World Book Day! What a fantastic day which started off with a 'book breakfast' in the hall, sharing stories and eating croissants. The hall was full! In the afternoon, we discussed our favourite books and where we like to read them (see pictures below). We then completed a traditional world book day quiz which was extremely competitive in year 6.

Once again, another great week in year 6!
