

Year 3 Blog - Week commencing 8th July 2024

Fun at the Beach!

This week in Year 3, the children visited the Beach! The adults were very impressed with how sensible the children were travelling to and from the beach. They had lots of fun creating sandcastles and spotting crabs. We would like to thank all of the adults that came to support for this trip and helped create an amazing memory for all the children to remember!

In writing, the children begun writing a recount of their beach trip. They discussed their favourite aspects of the trip including spending time with friends and playing with the sand. They will use this knowledge to write their recount in chronological order whilst focusing on including time conjunctions.

In maths, the children have been learning about statistics. We have been looking at pictograms and the children even created their own! They investigated lots of different things, including their peers favourite ice creams and how they travel to school.

In science, the children have been focusing on forces and magnets. They have examined magnetic field and can label the two ends of a magnet. They enjoyed watching as the magnets repelled and attracted to one another.
