

Year 3 Blog - Week commencing 17th June 2024

Winding rivers in Mexico

This week in Year 3, the children have been working hard on their geography lessons. They have found Mexico on a map, learnt the different parts of a river and have researched some of the different rivers in Mexico using their Chromebooks to make a fact file.

In maths, the children have begun learning about shape. They have been looking at different turns clockwise and anti-clockwise as well studying different angles.

In English, the children have begun learning about persuasive adverts. They began by looking at a range of different adverts how understood how they persuaded people to go on the holiday. Then they had a go at writing their own persuasive advert to a place they have been on holiday using rhetorical questions.

Have a great weekend! 😊
