

## Year 3 Blog - Week commencing 4<sup>th</sup> March 2024

### How many swot jumps could you do?

This week, Year 3 have enjoyed taking part in the second session of the 'My Futures' programme. This session was based on STEM careers and the children met 3 different people in careers including, a drone pilot, a 3D printer designer and someone who designs infer-red cameras. The children really enjoyed being given clues to each career and having to guess what job they did.

In science this week, the children enjoyed testing out the investigation 'Do people have stronger muscles because they use them more?' They were challenged to see how many swot jumps they could do and then recorded this information and came up with a conclusion based on this data. Well done to Esme and Jacob who did nearly 200 swot jumps without stopping!

The children also enjoyed celebrating World Book Day this year by dressing up as characters from their favourite books. Many children took part in the World Book Day breakfast in the morning where they came into school and shared some stories. The children also enjoyed hearing some of the teacher's favourite stories in the afternoon as they got a chance to hear a different teacher read to them.
