

Year 3 Blog - Week commencing 26th February 2024

Dreams and Goals!

In science this week, the children have been learning more about their topic 'Animals including Humans'. Particularly, we have been learning about the muscles in our bodies and other animals. The children have learnt how our muscles are responsible for every movement we make, including running, jumping, smiling and even breathing! We then conducted an experiment to examine our own muscles by extending our arms and squat jumping.

In DT, we have been continuing with our design brief of photo frames. The children are designing their end product by carefully choosing materials to ensure they are successful. We look forward to showing you our end products!

In PSHE, we have been continuing our topic 'Dreams and Goals'. We looked at different strategies to overcome any challenges we may face, and the children created some of their own too.

Check back next week to see what we get up to.

The Year 3 Team
