

Year 3 Blog – Week Commencing 12.06.2023: Feel the Force!

In Year 3 this week, we have started writing to entertain about the film Coco. The children are including expanded noun phrases, similes, speech and lots of different writing techniques to make it exciting! We will continue to finish this next week whereby the children will be changing the conclusion of the story.

In science this week we have been investigating force! We have been using magnets to assess whether objects in our classroom are magnetic. The children enjoyed this investigation and found lots of different items which they included in their results table.

In PSHE this week we looked at how to keep ourselves and others safe. The children were able to discuss different scenarios and talk about what they should do in specific situations.

Check back next week to see what we get up to!
