

Year 3 Blog - Week commencing 06.03.23: Please Miss Parkes

This week year 3 have enjoyed beginning their persuasive writing by writing a letter to Miss Parkes trying to persuade her to improve something about the school. Some children decided to write asking for more playtime, whilst others asked to be able to wear their own clothes to school.

We have also started our new topic in science about light. We began by investigating what happened when we looked through a box with only one small hole in. We found that it was completely dark, so decided to poke one hole in and saw what happened. This time we could see a small amount of the objects that were inside the box. This was because there was some light able to get into the box.

We have also begun using saws in DT to create our photo frames. We started by using a ruler to measure the length that our wood needed to be and then carefully used the saw to cut the wood. We tried really hard to carefully use the saws and made sure that we measured the wood accurately.
